Profile

Computer Engineering student passionate about backend systems, embedded systems, aerospace, & cybersecurity. Experienced in building full-stack projects, with strong teamwork and leadership skills developed through internships and university initiatives.

Education

Oct 2023 – present
New Cairo, Egypt

German University in Cairo

Computer Engineering (MET)

- 3rd year Computer Engineering student, graduating in 2028 (GUC).

Internships

Aug 2025 – Nov 2025
New Cairo

IT & Security Intern

Geidea

- Installed and configured Windows OS on employee devices, including BIOS access and system setup
- Diagnosed and resolved hardware and software issues for employee workstations
- Provided end-user technical support to ensure minimal downtime
- Tracked and documented issues using Jira ticketing system, following standard IT workflows

Jul 2025 – Aug 2025
New Cairo, Egypt

Backend Software Engineering Intern

Foodics

- Worked within a backend engineering team on a production-style online food ordering system.
- Contributed to backend feature development using Node.js and asynchronous programming.
- Collaborated using Git/GitHub, pull requests, and team workflows.
- Used Docker for consistent development environments and Postman/Jest for API testing.

Projects

Jul 2025 – Sep 2025

Online Food Ordering Backend System

Backend Internship Project | Foodics

- Developed a Node.js backend for an online food ordering / e-commerce application using RESTful APIs with role-based authentication (User/Admin)
- Integrated PostgreSQL with Prisma ORM to manage users, products, carts, and orders
- Wrote unit tests (Jest) and Dockerized the application for consistent deployment
- Implemented cart-to-order lifecycle and asynchronous backend logic & validated APIs using Postman
- Collaborated using Git/GitHub in a team workflow

Sep 2025 – Jan 2026

Travel Web Application

Networks & Communication | JavaScript University Project

- Built a client server full-stack web using Node.js, Express.js, MongoDB, EJS, JavaScript, & HTML.
- Implemented authentication & session management with secure routing and access control.
- Designed & integrated a MongoDB database with CRUD operations & duplicate validation logic.
- Developed destination pages featuring a Want-To-Go list & substring-based search functionality.

Sep 2025 – Jan 2026

HR Management System

Database 1 | University Project

- Developed a full-stack HR management web application using ASP.NET and SQL Server with role-based access (Admin, HR, Employee).
- Designed and integrated a relational database with stored procedures, functions, and views to support payroll, attendance, and leave workflows.
- Implemented authentication, automated payroll calculations, deductions, performance tracking, and multi-level leave approval system.
- Ensured seamless frontend-backend integration and data validation across modules.

Extracurricular Activities

Feb 2024 – present
New Cairo, Egypt

GUC MUN

Vice President

- Lead 200+ members, developing their skills & teamwork to host a successful MUN year.
- Train & manage 8 directors who are responsible for over 100 delegates.
- This role strengthens my leadership, communication, and organizational skills.

Oct 2024 – present
New Cairo, Egypt

GUC Revive (Enactus)

HR & Digital Marketing Member

- Supporting team projects and communication.
- Edited, captured events, & created campaigns to promote the club's events.
