Profile

Computer Engineering student passionate about software & embedded systems, but also ushering & interacting socially with people.

Education

Oct 2023 – present
New Cairo, Egypt

German University in Cairo
Computer Engineering (MET)

- 3rd year Computer Engineering student, graduating in 2028 (GUC).

Internships

Jul 2026 – Jul 2026
New Cairo, Egypt

Frontend Software Engineering Intern
Foodics

- Worked on a production-style frontend ordering application with cashier POS & admin dashboard workflows.
- Implemented role-based routing, menu browsing, cart/checkout flows, order tracking, and menu management screens.
- Used Vue 3, Vite, Pinia, Vue Router, Tailwind CSS, and shared API integration patterns.

Aug 2025 – Nov 2025
New Cairo

IT & Security Intern
Geidea

- Installed and configured Windows OS on employee devices, including BIOS access and system setup
- Diagnosed and resolved hardware and software issues for employee workstations
- Provided end-user technical support to ensure minimal downtime
- Tracked and documented issues using Jira ticketing system, following standard IT workflows

Jul 2025 – Aug 2025
New Cairo, Egypt

Backend Software Engineering Intern
Foodics

- Worked within a backend engineering team on a production-style online food ordering system.
- Contributed to backend feature development using Node.js and asynchronous programming.
- Collaborated using Git/GitHub, pull requests, and team workflows.
- Used Docker for consistent development environments and Postman/Jest for API testing.

Projects

Jul 2026 – Jul 2026

Foolix Frontend App 
Frontend Internship Project | Foodics

- Built a deployed Vue 3 ordering application with cashier POS and admin dashboard workflows
- Implemented role-based routing, menu browsing, cart/checkout flows, order tracking, & menu screen.
- Used Vite, Pinia, Vue Router, Tailwind CSS, and a shared API client for frontend state and integration
- Deployed the application on Vercel and validated production routing for direct links and refreshes

Mar 2026 – Jun 2026

SpecialFolio
Software Engineering Project | GUC

- Built a multi-role portfolio platform for students, instructors, employers, and admins
- Implemented protected routes, dashboards, portfolio browsing, course workflows, messaging, and notifications
- Designed role-based user experiences using React, Vite, React Router, reusable components.
- Supported software delivery concepts through structured workflows, feature ownership, & team development

Jul 2025 – Sep 2025

Online Food Ordering Backend System
Backend Internship Project | Foodics

- Developed a Node.js backend for an e-commerce application using RESTful APIs.
- Integrated PostgreSQL with Prisma ORM to manage users, products, carts, and orders
- Wrote unit tests (Jest) and Dockerized the application for consistent deployment
- Implemented cart-to-order lifecycle and asynchronous backend logic & validated APIs using Postman
- Collaborated using Git/GitHub in a team workflow

Extracurricular Activities

Feb 2024 – present
New Cairo, Egypt

GUC MUN
Vice President

- Lead 200+ members, developing their skills & teamwork to host a successful MUN year.
- Train & manage 8 directors who are responsible for over 100 delegates.
- This role strengthens my leadership, communication, and organizational skills.
